

Notifier Training Programme

AFP-2800: Networking

Course Overview

AFP-2800 Network training is for fire technicians looking to learn about NOTI•FIRE•NET (NFN), Notifier's networking protocol. Installers and service technicians new to NOTI•FIRE•NET will find this most useful as the course gives a technical and installation perspective.

Training Duration

- 1 day: 8.30am – 4.30pm
(Confirm with your local branch)

Prerequisites

- Completed the Notifier AFP-2800 basic and advanced courses
- Computer literate
- Laptop required

Learning Outcomes

On completion of the course, trainees will be able to:

- Recognise NFN networking topology
- Define NFN hardware components
- Identify termination points for network cards
- Interpret Notifier net points and RING4 addressing
- Diagnose faults on NFN networks
- Select suitable cabling for NFN networks
- Configure network settings on nodes
- Program across NFN panels with script logic

Instructional Method

This course is delivered as a group instruction, power point presentation and practical demonstration. Students will have access to AFP-2800 panels and field devices during the practical exercises. They will be provided with Notifier documentation and a Magni-Fire CD.
