

Date: 20<sup>th</sup> August, 2010

**Affected Products:** AZM-8 – 8 zone Distributed Field Module

Dear Valued Customer,

NOTIFIER is discontinuing production of the AZM-8, distributed field module. While this has been a very successful product offering over many years, as part of a continual review and improvements to our product range we are forced to announce its discontinuance.

For new projects NOTIFIER recommends that the following SLC modules are used as a replacement for the AZM-8.

- XP-6MA – Intelligent 6 way conventional zone interface module
- XP-6R – Intelligent 6 way relay module

It is our intention to provide support stock for this discontinued product until the cost of circuit board components are prohibitive or piece part components become obsolete. Please contact your Regional Sales Manager or Technical Support if you have any questions regarding this notice.

If you have any question please do not hesitate to contact me.

Sincerely,

James Edwards  
Product Manager
