## OnyxWorks™ Workstation

Dear Valued Customer,

NOTIFIER is pleased to announce the release of OnyxWorks™ Workstation v3.16. This new release provides many valuable feature upgrades and enhancements include the following features;

- Windows 7™ compatible
- Ability to support all screen resolutions, including widescreen
- Support for up to 200 individual networks
- Improved functionality for Notify-IP™ mass notification system
- Improved print functions

These new features maintain OnyxWorks™ Workstation as the premier command centre for facility monitoring and control of fire and evacuation systems.

Contact your systems consultant for complete release notes on all new features.

Sincerely,

James Edwards  
Product Manager
