**Affected Products:** OnyxWorks graphics workstation Version 3

Notifier is pleased to announce the release OnyxWorks graphics workstation version 3. The latest release incorporates many new and upgraded features over version 2, which improve functionality, reliability and usability. The upgraded features include:

- Improved user interface
- Added Paging, and Email output options
- Added support for redundant gateways
- Added support for multiple icon sets
- Improved configuration tool utility – now include macro editor
- Added event label configuration
- Added Windows event printer driver for PRN printers
- Removed command buttons
- Removed configurable Fkeys
- Added expanded event information box

If you have any question please do not hesitate to contact me.

Sincerely,

James Edwards  
Product Manager
