

Date: 27 October 2009

Affected Products: Noti-Fire-Net Modbus Gateway

NOTIFIER is pleased to announce the release of the Modbus Gateway, which provides a communication link between the AFP-2800 fire alarm control panels and other networks that use the Modbus/TCP communication protocol.

Features:

- Compatible with standard Modbus/TCP masters
- Compatible with Standard and High Speed NOTI-FIRE-NET networks
- Supports up to four Fire Alarm Control Panels
- Provide data such as: event type, active/inactive, enabled/disabled, acknowledged/unacknowledged, device type and system troubles
- Provides ability to control fire alarm control panels
- Self-configuration of all nodes and points via Modbus Configuration Tool
