

Notifier Training Programme

AFP-2800: Advanced

Course Overview

AFP-2800 Advanced training is for fire technicians looking to learn about Notifier's addressable panels and advanced features. Installers and service technicians new to Notifier panel programming will find this most useful as the course gives a technical and programming perspective.

Training Duration

- 1 day: 8.30am – 4.30pm
(Confirm with your local branch)

Prerequisites

- Completed the Notifier AFP-2800 basic course
- Understanding of fire systems
- Computer literate
- Laptop required

Learning Outcomes

On completion of the course, trainees will be able to:

- Install PCI software
- Operate PCI programming software
- Perform upload and download of project files
- Understand the principles of BOOLEAN logic
- Write AFP-2800 scripts and special scripts
- Program isolation group scripts
- Program fan controls scripts
- Present print out of compensation values
- Compose a print out of configuration and history files

Instructional Method

This course is delivered as a group instruction, power point presentation and practical demonstration. Students will have access to AFP-2800 panels and field devices during the practical exercises. They will be provided with Notifier documentation and a Magni-Fire CD and Upload/Download cable.
