

Notifier Training Programme

Notifier DA-BOWS Training

Course Overview

DA-BOWS occupant warning system training is for those new to Notifiers occupant warning systems. Installers, testers and service technicians will find this most useful as the course gives an understanding of card functions, fault finding and basic installation.

Training Duration

- ½ day: 8.30am – 12.30pm
(Confirm with your local branch)

Prerequisites

- Understanding of fire systems

Learning Outcomes

On completion of the course, trainees will be able to:

- Operate DA-BOWS system
- Program messages and tones
- Define system modular components
- Demonstrate termination points for devices
- Interpret terms used for occupant warning systems
- Identify various speakers
- Clarify speaker connections and precautions
- Add and remove connections safely on live systems
- Modify DA-BOWS settings and tones
- Network multiple DA-BOWS systems
- Interpret, diagnose and resolve fault codes
- Operate seven segment display

Instructional Method

This course is delivered as a group instruction, power point presentation and practical demonstration. Students will have access to a DA-BOWS system and field attachments during the practical exercises. They will be provided with Notifier documentation and a Magni-Fire CD.
